TITAI / EVIDENCE CONTROL PLANE / V12

Execution is not proof. Proof is not release.

A recovery-first operator surface separating machine activity, human authority, evidence, uncertainty, and release readiness.

Run control record

Authority exercised and state that can be reconstructed.

RECONCILING

MODEL DECISION
local/verifier-7b
Verifier quality, privacy, and offline eligibility.

GOVERNED MEMORY
6 selected / 2 quarantined
Instruction-like evidence excluded.

SIDE EFFECT
Outcome unknown
Blind retry denied; reconciliation required.

LEASE AUTHORITY
worker-4 / token 18
Token 17 is fenced and cannot commit.

HUMAN AUTHORITY
1 pending
Revision 3 expires in 08:42.

BUDGET

Context tokens · 1,802 output tokens.

AUTHORITY IS NEVER INFERRED FROM MODEL OR MEMORY CONTENT.

Pilot evidence gate

Unknown evidence blocks promotion.

4 BLOCKERS

- PASS — **Crash recovery** — One side effect across two worker attempts.
- PASS — **Encrypted restore** — Clean target verified against integrity hash.
- BLOCK — **Native persistence suite** — Native binding unavailable in this environment.
- UNKNOWN — **Browser accessibility** — No keyboard or screen-reader evidence is bound.
- BLOCK — **Approval restart** — Conversation continuation is not serialized.
- UNKNOWN — **Independent verifier** — No clean-worker attestation bound to release.

Temporal evidence ledger

Append-only operational claims with explicit uncertainty.
